KEEPING YOU SAFE SINCE 1879

TOTAL ABOVE THE NECK

Personal Protective Equipment

 A BRITISH BRAND
SINCE 1879

Centurion Safety Products, By Your Side Since 1879

Based in Thetford, England, our-cutting edge head protection systems embody a fusion of total safety and ease, enabling wearers to concentrate on their tasks unhindered.

As global leaders, we prioritise understanding users, shaping a safer working world.

Our product range, including safety helmets, bump caps, hearing and respiratory protection, exceeds industry norms. Meticulously designed for practicality and style.

Through customer education and commitment to excellence, Centurion ensures a safe and confident work environment, striving for a sustainable future.

NEXUS E:PROTECT

The WORLD'S FIRST MOST SUSTAINABLE HELMET

Unveiling our groundbreaking helmet—a fusion of safety, peak performance, and a dedicated ally in the battle against climate change. Crafted sustainably, driving towards the replacement of fossil fuels.

ATTRIBUTES

- Exemplifying unparalleled sustainability, surpassing ABS standards.
- Trimmed down by an impressive 14g compared to its ABS counterpart, without compromising structural integrity.
- A force to be reckoned with, matching and even exceeding ABS strength, with the added capability of further reinforcement.
- Our most sought-after helmet now proudly sets itself apart with newly acquired eco-friendly advantages.
- Our premium materials, meticulously sourced from select suppliers, trace back to their origin. A sustainability breakthrough, the Nexus E:Protect is crafted from polypropylene and fortified with a wood fibre matrix at Centurion. It's not just a product; it's a commitment to a greener tomorrow.

NEXUS EXTREME MIPS®

The WORLD'S FIRST Safety Helmet with the Mips® Cradle.
The Nexus Extreme Mips® combines a low friction layer that allows the head to move inside the helmet (10mm – 15mm relative motion in all directions) which can redirect the harmful rotational motion otherwise transferred to the head.

ATTRIBUTES

- Exceeding standards and transferring less shock for improved impact and penetration protection.
- Premium Grade ABS provides high performance and optimal strength to weight ratio for the ultimate wearer protection.
- Optimised Micro Peak for maximum upward visibility.
- EN12492 Chinstrap for the ultimate retention on the ground and at height.
- Premium "Twist 2 Fit" wheel ratchet for improved head and nape protection.

NEXUS HEIGHTMASTER

Our pioneering helmet combines an advanced performance liner for improved impact with modern recreational styling - including a replaceable 4-point adjustable EN 12492 chinstrap.

ATTRIBUTES

- Advanced performance liner provides extra shock and penetration protection according to EN 12492
- Easily replaceable chinstrap for improved hygiene
- Chinstrap side adjusters for improved wearer fit and comfort
- Polyester webbing ensures that it doesn't catch on workwear Velcro

NEXUS EXCEED MIPS®

The Nexus Exceed Mips® , combines a low friction layer that allows the head to move inside the helmet (10mm – 15mm relative motion in all directions) which can redirect the harmful rotational motion otherwise transferred to the head

ATTRIBUTES

- Includes the Mips® Cradle for enhanced wearer safety.
- Exceeding standards and transferring less shock for improved impact and penetration protection.
- Premium Grade ABS provides high performance and optimal strength to weight ratio for the ultimate wearer protection.
- Optimised Micro Peak for maximum upward visibility.
- EN 397 Chinstrap for additional wearer comfort and helmet stability.
- Premium "Twist 2 Fit" wheel ratchet for improved head and nape protection.

CONCEPT MIPS®

Embrace unparalleled protection with our most powerful helmet, now seamlessly fortified with the cutting-edge Mips® technology for an unparalleled head protection system.

ATTRIBUTES

- 20% lighter than most helmets
- The Mips® safety system is designed to provide added safety for helmets in many accidents. For certain impacts, the Mips system can reduce harmful forces that might otherwise be transferred to the user's head
- Manufactured from high quality, strong ABS material
- Unique extended nape ensures enhanced neck protection

SPECTRUM SECUREPLUS

ABS safety helmet system with integrated over spectacles to deliver grade B EN 166 impact protection and ANSI/ISEA Z87+. Also suitable for wearers of prescription eyewear.

ATTRIBUTES

- Available with and without 4 point SecurePlus chinstrap
- Eyewear provides extra lateral and bottom coverage and provides extra protection against particles
- Anti-scratch and anti-mist coating on eyewear provides improved durability and visibility
- Soft nose bridge for enhanced wearer comfort
- Full over spectacle adjustment built in to ensure the user can obtain a perfect fit
- Spectrum with badge holder available
- Over spectacles with Grade B impact protection

VISION SECUREPLUS

Our industry-leading head protection system offers wearers of prescription glasses total safety reassurance with moulded integrated eye protection uniquely certified to EN 166 grade A high impact levels and ANSI/ISEA Z87+.

ATTRIBUTES

- Available with and without 4 point SecurePlus chinstrap
- Optical clarity to Class 1 for continuous use - standard on all Centurion face protection
- Grade A High Energy Impact Protection to EN 166: providing the highest impact protection possible within EN 166 - better than any other integrated eyewear on the market
- Large side pull tabs enable the wearer to quickly and easily move the visor up and down even when wearing gloves
- Includes anti-scratch and anti-mist coating for improved durability and visibility

1125 CLASSIC

Our general purpose safety helmet comes with a 6-point Terylene cradle and brushed nylon sweatband.

ATTRIBUTES

- Reduced or Full Peak available
- Vented and Unvented versions available

STANDARD

APPROVED TO

[EN 397] 1000V a.c (unvented shell only) | MM | -30°C
[ANSI/ISEA] Z89.1-2014 Type 1 Class E (unvented shell only)

1100 CLASSIC

Our general purpose safety helmet is fitted with a 6-point plastic cradle.

ATTRIBUTES

- Vented and Unvented versions available
- Also available in Forestry Kit

STANDARD

APPROVED TO

[EN 397] 440V a.c (unvented shell only) | MM | -10°C

CONCEPT VULCAN

Setting new standards in extreme operating conditions. This powerhouse thrives in temperatures reaching a scorching height of +150°C.

ATTRIBUTES

- Fully adjustable wheel ratchet for a custom fit, with Vabon Sweatband for added comfort
- Effectively shields against molten metal exposures, ensuring unparalleled safety in high temperature environments
- Withstands voltages to 440V a.c, providing robust insulation against electrical hazards
- Operates flawlessly in a broad temperature spectrum, from a low of -20°C to a high of +150°C, guaranteeing reliable performance in diverse climatic conditions

STANDARD

APPROVED TO

[EN 397] 440V a.c | MM

VULCAN

Our specialised fibreglass Vulcan safety helmet is designed to protect workers where there is a risk from high levels of radiant heat.

ATTRIBUTES

- GRP fibreglass material protects workers in foundries from high heat
- Fully adjustable wheel ratchet for a custom fit
- Fully removable EN 397 2 point optional leather chinstrap
- Comfortable fit with Terylene 6-Point Cradle and Brushed Nylon Sweatband

HELMET PROTECTION STANDARDS

EN 397 Helmets for general use in construction and industry to provide protection to the wearer against falling objects and consequential brain injury and/or skull fracture.

ANSI Z89.1 (Type 1) Minimum performance requirements for protective helmets that reduce the forces of impact and penetration and that may provide protection from electric shock. Type 1 helmets are intended to reduce the force of impact resulting from a blow only to the top of the head.

MANDATORY TESTS	Shock Absorption	EN 397	ANSI Z89.1
	Drop height	1 metre	1.2 metre (freefall)
	Maximum force allowed	5 kiloNewtons	3.78 kiloNewtons (average) 4.45 kiloNewtons (individual)
	Energy Transmitted during test	49 joules	53 joules
	Striker face and weight	50mm radius hemispherical, 5kg	95mm diameter, radius 48mm, 3.6kg
	Test Conditions	-10°C, +50°C, Wet at +20°C, plus UV	-18°C, +49°C, Wet at +23°C
	Penetration Resistance	EN 397	ANSI Z89.1
	Drop height	1 metre on area 50mm radius	2.5 metres on area 38mm radius on crown
	Energy Transmitted during test	29 joules	24.5 joules
	Striker Mass	3kg	1kg
	Test Conditions	-10°C, +50°C, Wet at +20°C, plus UV	-18°C, +49°C, Wet at +23°C

BSI Kitemark

By purchasing a product accredited with the BSI Kitemark, the user can be confident that the product continually meets the performance characteristics of the initial sample submitted for type approval.

BSI independently audit test the product on a regular basis and in order for us to retain the Kitemark, we must routinely batch test products in our own laboratory and have process control procedures in place within our production.

Centurion also hold BS EN ISO 9001:2015, a quality management standard, covering the design management, development and manufacture of our products, having held ISO 9001 since 1992.

OPTIONAL TESTS	Lateral Deformation (LD)	
	Provides a level of protection against lateral compression, indicating improved side strength of helmet. Test Method: A pressure of 43kg is applied on both sides of the shell for 5 minutes and then the amount of helmet deformation is measured.	EN 397 only
	Low Temperature Performance	
	Helmet will still provide protection when worn at or above this temperature. Test Method: The mandatory shock absorption and penetration resistance tests are repeated at stated low temperatures.	-20°C/-30°C - EN 397 -30°C - ANSI Z89.1
	Electrical Insulation	
	Test indicates protection from electrical shock. EN Test Method: The shell is immersed for 24 hours in 3 grams per litre of salt water. A current is passed through electrodes which are positioned both inside and outside the helmet. The maximum electrical leakage allowed is 1.2mA for 30 secs at 1200V a.c. ANSI Test Method: Test samples shall be proof-tested at indicated voltage (phase to ground).	440V a.c. - EN 397, 2200V a.c. - Class G ANSI Z89.1, 20,000V a.c. - Class E ANSI Z89.1
	Molten Metal (MM)	
	The test ensures that there is no penetration of molten metal splash, indicating a quality, heat resistant shell. Test Method: Test procedure is 150g of molten iron dropped onto a 50mm radius area on helmet crown.	EN 397 only
	Extra Features outside the scope of EN 397	
	Purpose and test method is as per the relevant EN 397 options detailed above, but performance indicates a higher level of protection.	-40°C and 1000V a.c.
	Resistant to Flame (F)	
	Test ensures helmet does not ignite or burn after a flame is applied for a brief period of time. EN 397 Test Method: The end of the flame is applied to the outside of the cap, 50-100mm from the crown for 10 seconds.	Mandatory test for EN 397 (flame resistant test) and ANSI Z89.1 (flammability test)

EXCEEDING STANDARDS

Here at Centurion, we believe that the standards that govern head protection (EN 397), written in 1995, and adopted from ISO3873 in 1977, could do more to meet the protection requirements for the modern working environment (available materials and methods have changed significantly).

We encourage the end customers we work with to consider their specification beyond the EN 397 standard written so many years ago. We also believe that facilities and health and safety executives should consider adding the following to their purchase specification:

BSIF Registered Safety Supplier Scheme (RSSS): Every RSSS member is independently audited every single year. Products are subjected to random testing for performance and compliance to claimed standards. RSSS members commit to their customer-facing employees being trained in the Safe Supply Accreditation programme to ensure competence in PPE and Health & Safety. Membership of the scheme involves more than testing and training. It includes a shared commitment to advocating the scheme's benefits to other health and safety providers.

Kitemark: The Kitemark is an unrivalled stamp of quality. From its creation in 1903, it is now recognised globally as a business super brand – whose independent testing has become the benchmark in product quality and compliance.

The Kitemark, in our view, is so valuable for two reasons.

Firstly, unlike the CE mark which certifies businesses to minimum legal requirements, the Kitemark sets standards of compliance that go far beyond the legal minimum.

We believe in always striving for what is best, not what is simply permitted. And we believe the Kitemark is a fitting testament to this ethos.

Secondly, much of the Kitemark's rigour is rooted in its insistence on regular testing and re-testing businesses against its exacting standards. And in its constant monitoring and review of those

standards to ensure they remain resolutely fit for the world they operate in. So, the Kitemark isn't proof that a business has 'passed a test' – it's proof that a business is constantly maintaining the highest of standards – a feat that demonstrates a deeper commitment to going above and beyond. Our job is to keep people safe. So, our view will always remain black and white. There can be no "that'll do" when lives are at risk. Acceptable isn't ever acceptable when we know we can push for better. And meeting standards will never be enough when we could be setting standards.

Chinstraps: At Centurion, we believe that chinstraps should be mandatory and that chinstraps help improve site safety. This is paramount when working in an environment where a helmet could fall on someone below, this is particularly important and often referred to "working at height". If a wearer's helmet isn't securely fitted, upon impact the protection levels will be comprised. If a wearer were to be struck by an object there is a chance that the impact could knock the helmet off their head, this would not happen if you were wearing a chinstrap and would provide protection against any subsequent impacts.

We test our products to levels above and beyond the norm, giving workers the confidence to deliver their best.

COMPATIBILITY GUIDE

At Centurion, our mission is to provide compatible, comfortable and stylish head protection systems. PPE compatibility is important as compatible systems have many benefits:

- A system from the same manufacturer is designed and tested to work together
- Fit and therefore comfort is optimised
- Wearer compliance and productivity is improved as wearers are satisfied with their PPE system

HELMET ACCESSORIES

Our system accessories combined with our helmets, caps and respiratory headpieces provide total system compatibility so workers can focus on the tasks at hand.

FACE PROTECTION STANDARDS AND OPTIONS

Standard	Option	Type	Description
EN 166:2002	1	OPTICAL CLASS	Highest quality level, required for continuous usage
EN 166:2002	A	MECHANICAL STRENGTH / IMPACT RESISTANCE	High speed particles with high energy impact (190m/s)
	B		High speed particles with medium energy impact (120m/s)
	F		High speed particles with low energy impact (45m/s)
	T		Additional resistance to high speed particles at extreme temperature (-5°C-55°C)
ANSI/ISEA Z87.1:2010 / 2015	Z87+		American National Standard for Eye and Face Protection. Impact Rated (91m/s)

APPLICATION BASED:

EN 166:2002	9	High / radiant heat environments:	Non adherence of molten metal and resistance to penetration of hot solids
EN 171:2002	4-5		Protection against InfraRed radiation. Shade 5 filter. Typical application in terms of mean temperature sources up to 1390°C
EN 166:2002	3	Chemical and splash environments	Protection against liquid droplets and splashes
EN 169:2002	3	Welding and braze welding of heavy metals	Filters for personal eye protection used in welding and similar operations. Scale number 3.
EN 166:2002	5		Welding with emissive fluxes (notably light alloys) Oxygen Cutting. Scale number 5.
EN 175:1997			Equipment for eye and face protection during welding and allied processes
EN 170:2002	2C-1,2		For use with sources which emit predominantly Ultra Violet Radiation at wave lengths shorter than 313nm and when glare is not an important factor. This covers the UVC and UVB bands. With enhanced colour recognition.
	2-1,2		As 2C-1,2 above - however colour recognition may be impaired.
EN 1731:2016	S	Forestry	Mesh type eye and face protectors for industrial and non industrial use against mechanical hazards. S marking for Robustness.
EN 166:2002	8	Arc flash risks	Protection against Short Circuit Electric Arc. No test is required; screen needs to meet minimal requirements of material type - (best is Polycarbonate), thickness - 1.4mm minimum, scale number - 2-1,2 or 2C-1,2, height - 150mm minimum and visibility.
GS-ET-29 Revision 1 (2010-12)	Class 1 or 2		Requirements for the testing and certification of face shields for electrical works - 'Arc-in-a-box' test. Arc Protection Classes: Class 1 - 135kJ/m2 incident energy, 3.2 cal/cm2 (4kA), Class 2 - 423kJ/m2 incident energy, 10.1 cal/cm2 (7kA) Visible Light Transmittance (VLT) Classes: Class 0 - $\geq 75\%$, Class 1 - $50\% \leq \text{VLT} \leq 75\%$, Class 2 - $\text{VLT} < 50\%$
NFPA 70E ASTM 2178	Class 3		ASTM F2178 is the Standard Test Method for Determining the Arc Rating and Standard Specification for Eye or Face Protective Products. This standard test method was introduced by the American Society for Testing and Material (ASTM) and is dedicated to test face protection PPE according to NFPA 70E classifications.

ANTI-STATIC RISKS

Specific Centurion Accessories with the Nexus helmet are certified by our Notified Body, BSI, to the electrostatic test, which assesses and confirms the electrostatic chargeability, according to IEC 60079-32-2:2015. This provides the confidence that these products can not cause an electrostatic charge and thereby not be the cause of an explosive spark or ignition.

Helmet and Accessories	Hazardous area (Zone as per Directive 99/92/EC)	Group (as per DIN EN 60079-0)

CONTOUR FACE PROTECTION

CONTOUR XIV

GREY HT ARC FACE SCREEN

Use the Contour XIV Grey HT Face Screen with the Contour Carrier for specialised arc flash protection. Providing protection to ATPV Class 3 26cal/cm² and also GS-ET-29 Class 2.

ATTRIBUTES

- System suitable for arc flash protection to 26cal/cm² (ATPV - US Arc standard) and 10cal/cm² (GS-ET-29 - European Arc standard)
- Using Active Smart Technology - using the Arc energy to provide maximum protection to the wearer during an arc incident
- With anti-fog and anti-scratch protection
- Easy fit moulded polycarbonate face screen with transparent, compact chinguard
- Contour Carrier compatible with Centurion Nexus and Concept helmets

HIGHEST LEVEL OF ARC PROTECTION IN
RANGE WITH EUROPEAN & US ARC APPROVALS

CONTOUR XIII

CLEAR-GREY HT (HIGHLY TRANSPARENT) ARC FACE SCREEN

Utilises the latest Arc technology; the clearest European Class 2 screen with the highest Visible Light Transmittance providing improved colour recognition for the user.

ATTRIBUTES

- Specialised nano particles technology providing Class 2 arc protection highest Visible Light Transmittance Class 0 (>80%)
- Permanent Anti-Fog and Anti scratch coating
- Longer in use life of 10 years with permanently attached Chinguard
- Contour Carrier compatible with Centurion Nexus and Concept helmets

EASY FIT, LOW
PROFILE SYSTEM

CLASSIC FACE PROTECTION

CLASSIC FACE SCREENS

General Purpose face screens available in polycarbonate for medium energy impact protection, acetate for chemical resistance or acetate green for welding.

- All face screens can be used with both the Classic Carrier and the Classic headband mounted Browguard

CLASSIC CARRIER

A carrier for fitting helmet mounted face screens. For fitting Classic face screens to all Centurion helmets.

CLASSIC BROWGUARD

Classic Browguard for fitting Classic face screens when head protection is not required.

CLASSIC CHINGUARD

Chinguard for fitting to Chinguard Face Screens for additional coverage.

FORESTRY VISOR

In the unique forestry environment, our visor offers a high degree of face protection without restricting the vision of the wearer. The visor is pre-mounted onto a Centurion carrier for total protection against falling debris and for stability during use.

- Forestry Kit available, see page ??? for further information

HIGH HEAT FACE PROTECTION & ACCESSORIES

HIGH TEMPERATURE FACE SCREEN CARRIER

In conjunction with the high temperature classic face screens, a complete high temperature face system designed to supply specialist protection in areas at risk of radiant heat. Suitable for use on Nexus high heat and Vulcan helmets.

HIGH TEMPERATURE CLASSIC FACE SCREENS

High Temperature face screens available for high temperature applications.

- The Clear Triacetate or Gold Polycarbonate screen can be used with either High Heat Carrier
- The Duo screen benefits from a Copper top screen that provides protection from radiant heat as well as infrared protection for the eyes while a Clear bottom screen provides improved visibility and safety when looking down and moving around.

2 POINT EN 397 LEATHER CHINSTRAP

Specifically designed to complement the Nexus High Heat and Vulcan helmets, a leather chin strap to cope with high temperature environments.

HIGH TEMPERATURE ALUMINISED NECK CAPE

Complementing the Nexus High Heat and Vulcan helmets, this aluminised Neck Cape ensures maximum heat dissipation from the wearer.

HEARING PROTECTION

SANA HELMET MOUNTED

The Centurion Sana Ear Defenders offer a wide range of attenuation levels, from 25dB to 34dB, to suit the majority of industrial environments, providing protection against light industry noise through to extremely high noise levels.

ATTRIBUTES

- Colour coded ring and front printing for easy identification and selection of the correct attenuation level.
- Compatible with the full range of Centurion safety helmets and face protection. *

SOFT WIDE CUSHIONS FOR MAXIMUM COMFORT

SANA HEADBAND MOUNTED

The Centurion Sana Ear Defenders are also available in a Headband Mounted version.

*S570 clip required for 1125 Reduced Peak and Vulcan

VISIBILITY ACCESSORIES

Have introductory text such as: Centurion has considered the safety of workers in dark or poor light conditions; solutions to make them visible are High Intensity Reflective stickers, ideal for such as oncoming vehicles or Phosphorescent stickers for where there is total darkness.

HIGH INTENSITY REFLECTIVE STICKERS

Making the safe, safer. A set of high intensity, highly reflective accessory stickers, bespoke for the Centurion range of safety helmets. Helps to increase visibility of workers in low light level environments meeting material specification of EN 12899-1 Ra2.

- Provides coverage on front, side, rear and top of the helmet
- Sticker set for Reflex, Concept, Vision Plus, Nexus and Spectrum helmets.

VIZLITE DT HELMET STICKERS

The first industrial safety helmet solution providing wearer visibility with patent pending phosphorescent material.

- Vizlite DT helmet stickers absorb both natural and artificial UV light to emit an after glow in low light and dark conditions.
- The premium material exceeds ISO 17398 Class D decay time by 55% - the afterglow lasts up to 8 hours.
- Suitable for use on Centurion Nexus, Concept, Spectrum and Vision Plus helmets providing 360 visibility.
- Use in conjunction with Centurion High Intensity Reflective Stickers for visibility in both total darkness and when a vehicle headlight activates the reflective technology.

COLOUR VARIATIONS

S S30HIRS

CHINSTRAPS & MOUNTING

Global data and our own analysis highlighted changes in the market with chinstrap usage becoming more specified in growing regions such as Scandinavia and Asia. Working at height is also a rapidly growing market segment, and so too are the injuries that result from this environment. We strongly believe chinstraps should be fitted on industrial safety helmets – whether on or above ground. They provide added helmet retention / security and help workers shaping our world deliver their best.

4 POINT EN 12492 CHINSTRAP

Designed specifically for the demanding Nexus HeightMaster helmet, a replacement chinstrap to ensure EN 12492 compliance.

- Grey in colour to differentiate workers on site from EN 397 chinstraps

4 POINT EN 397 SECURE PLUS CHINSTRAP

Ergonomically designed chinstrap conforming to EN 397. Fitted to all SecurePlus helmet variants.

- Black in colour to differentiate workers on site from EN 12492 chinstraps

2 POINT EN 397 ELASTICATED CHINSTRAP

2 point elasticated chinstrap to complement the Centurion range of helmets, fully approved to EN 397. Fitted with chin cup for extra comfort

- Black in colour to identify chinstrap as an EN 397 chinstrap

HELMET ACCESSORY CLIPS - CONNECT, EURO AND CONTOUR

Accessory clips to allow the fitment of hearing and face protection products.

- Connect and Euro clips can be used on Centurion helmets with Combi slots (1100, 1125, Reflex, Concept and Spectrums)
- Connect clips can be used on Vulcan and 1125 Reduced Peak helmets
- Euro clips can be used on Nexus and Vision Plus helmets
- Contour clips can be used on Nexus and Concept helmets

COOLING SYSTEMS

KALIS DRY COOLING ACCESSORIES

The patent-pending Dry Cooling technology is designed to provide enhanced cooling comfort for the wearer. The Kalis dry cooling system is shown to keep the wearer 15°C/27°F cooler than ambient temperature and completely dry. It keeps the wearer cooler for up to 4 times longer compared to wet cooling products.

ATTRIBUTES

- Keeps the wearer 15°C (27°F) cooler than the ambient temperature
- Up to 5 times longer in use life*
- 100% dry
- Anti-bacterial and machine washable
- Utilises technology found in the high end sports industry

In Partnership with:

UP TO 4X
LONGER COOLING*

SUN CAPES

Lightweight Sun Cape that protects against UltraViolet UPF 50+, blocks 98% of UV radiation. Using fabric developed specifically to keep the wearer dry, cool and comfortable.

ATTRIBUTES

- Available in Bright Yellow or Orange
- Fits to all Centurion helmets

WARMING SYSTEMS

At Centurion, we strive to design and offer solutions that ensure suitability with various tasks and potential hazards. Intuitive and compatible solutions will greatly enhance the user experience and, in turn, drive compliance. Our seasonal accessories have been designed to provide increased comfort for workers in the harshest conditions. A specialised version is available to provide flame retardant, anti-static and arc Class 2 protection.

HELMET AND BUMP CAP WINTER BEANIE

The snug fitting Winter Beanie fits securely on the head under a helmet or bump cap to provide warmth and comfort during winter months or in cold storage environments.

- Tested in all Centurion helmets and bump cap systems
- The water resistant coating provides protection from the rain

Product Codes: S50HCB

UNIVERSAL FLEECE HELMET LINER

The Centurion Fleece helmet liner fits between the Centurion cradle and helmet shell to give an excellent, secure fit of the helmet on your head.

- Fits between cradle and helmet shell for full integration

Product Codes: S50UFLSP Specialised Fleece Helmet Liner (flame resistant, anti-static and arc protective fabric)

FROST CAPE

- Frost Cape: water resistant outer with fleece inner and bright orange or yellow colour with reflective rear strip. Zip top fastening to be fitted to fleece helmet liner
- Frost Cape with ear defender compatibility: All as per existing Frost Cape, but with integrated Fleece Helmet Liner and facility to use helmet-mounted Ear Defenders or for improved hearing due to mesh ear flaps

Product Codes: S50HVFYC Frost Cape bright Yellow / S50HVOFC Frost Cape bright Orange / S50HVEDFC Frost Cape bright Yellow with Ear Defender Compatibility / S50HVOEDFC Frost Cape bright Orange with Ear Defender Compatibility / S50NBFCSP Specialised Frost Cape (flame resistant, anti-static and arc protective fabric) for the specialised fleece helmet liner

FACE WARMER

Fits to Frost Cape for total head and face warmth.

Product Code: S50FW: Face Warmer

A woman with blonde hair, wearing black-rimmed glasses, a black bump cap, and a high-visibility yellow jacket with grey accents, is smiling and looking slightly upwards and to the right. The background is a blurred industrial setting with cardboard boxes.

CAP PROTECTION SYSTEMS

Our innovative bump cap range sets standards in form and function – deeply practical, supremely comfortable and stylishly designed.

AIRPRO SECURE PLUS BUMP CAP

Our flagship baseball bump cap designed to provide unrivalled head retention and wearer comfort. The first ever baseball bump cap to incorporate a ratchet adjustment system.

ATTRIBUTES

- Innovative new ratchet adjustment
- Crown ventilation for increased cooling
- Treated with Dupont Teflon for easy cleaning and improved hygiene
- Liner manufactured from ABS for optimal strength
- Peak options available: Full (50mm), Reduced (30mm)
- Side Scoops available for compatibility with headband mounted ear defenders (MOQ 500 units)

ATTRIBUTES

- Features a PVC sweatband for comfort
- Replaceable, adjustable plastic cradle
- Suitable for chilled work enviroments up to -30°C

CAP PROTECTION STANDARDS

EN 812 Bump Caps provide protection to the wearer against the effects of striking head/scalp against hard or sharp stationary objects. Not intended to provide protection against effects of falling, thrown objects, moving or suspended loads.

MANDATORY TESTS	Shock Absorption		EN 812
	Drop height		0.25 metre
	Maximum force allowed		15 kiloNewtons
	Energy Transmitted during test		12.5 joules
	Striker face and weight		100mm diameter flat, 5kg
	Test Conditions		-10°C, +50°C, water immersion and artificial ageing
	Penetration Resistance		EN 812
	Drop height		0.5 metre
	Energy Transmitted during test		2.5 joules
	Striker Mass		0.5kg
	Test Conditions		-10°C, +50°C, water immersion and artificial ageing

BSI Kitemark

By purchasing a product accredited with the BSI Kitemark, the user can be confident that the product continually meets the performance characteristics of the initial sample submitted for type approval.

BSI independently audit test the product on a regular basis and in order for us to retain the Kitemark, we must routinely batch test products in our own laboratory and have process control procedures in place within our production.

Centurion also hold BS EN ISO 9001:2015, a quality management standard, covering the design management, development and manufacture of our products, having held ISO 9001 since 1992.

OPTIONAL TESTS	Low Temperature Performance	
	Helmet will still provide protection when worn at or above this temperature. Test Method: The mandatory shock absorption and penetration resistance tests are repeated at stated low temperatures.	-40°C - EN 812
	Resistant to Flame (F)	
	Test ensures cap does not ignite or burn after a flame is applied for a brief period of time. EN 397 Test Method: The end of the flame is applied to the outside of the cap, 50-100mm from the crown for 10 seconds.	EN 812 only

CORPORATE BADGING

Here at Centurion, we aim to make the complex simple, our four-step corporate badging process makes branding safety helmets and bump caps easy. Corporate badging is one of the most important elements your company requires.

ATTRIBUTES

- No set up cost for new logo's
- Spectrum has the widest front print area of any safety helmet
- Pad print on the front, rear and sides of helmets
- Embroider or transfer printing on the front of caps

END USER BENEFITS

- Promote your company
- Help your employees stand out on site
- Easily identify your workers task or position
- Use the helmet to promote safety messages
- Ensures PPE is provided by the company

RESPIRATORY PROTECTION SYSTEMS

We have been producing respiratory systems for over 20 years under the Martindale brand. Now under the Centurion brand we continue to drive forward with numerous innovations and improvements. Our advanced respiratory protection is designed to help workers thrive in the most challenging environments.

CONCEPT AIR

HELMET AND FLIP UP VISOR KIT

Our most popular complete respiratory protection system, complete with head and face protection all in a storage box.

ATTRIBUTES

- 200 litres of filtered air per minute
- Lightweight and robust helmet/visor system
- Lightweight Li-ion battery, with 8 hour duration
- Complete with a TH2PSL particulate filter and 5 pre-filters

**BATTERY UP TO
25% LIGHTER**

NEVIS UNPOWERED FRESH AIR (FABA) SYSTEM

Unpowered Fresh Air Breathing Apparatus system suitable for use in Oxygen deficient atmospheres, including confined spaces and potentially explosive environments for short duration work

ATTRIBUTES

- Lightweight Full-Face Mask – excellent vision with an excellent fit
- 9m hose supplied in storage box
- Can be used with hose lengths up to 20m

APPROVED TO
[EN 138] Class 2

**LIGHTWEIGHT FULL FACE
MASK AVAILABLE IN 3 SIZES -
WITH TWIN HOSE CONNECTION**

NEVIS POWERED FRESH AIR (FABA) SYSTEM

Powered Fresh Air Breathing Apparatus system. Air is supplied from an electrical supplied blower system for longer duration work.

ATTRIBUTES

- Up to 500L/min of supplied fresh air
- Lightweight Full-Face Mask – excellent vision with an excellent fit
- 9m hose supplied in storage box
- Can be used by 1 or 2 users up to 40m

APPROVED TO
[EN 138] Class 2

MASK AVAILABLE IN 3 SIZES -
WITH TWIN HOSE CONNECTION**

RESPIRATORY PROTECTION STANDARDS

Whilst every effort is made to ensure the accuracy of product information, Centurion Safety Products Ltd reserves the right to improve and modify specifications at any time without prior notice.

WORK PLACE PROTECTION FACTORS -

What is a protection factor?

Nominal Protection Factor: The minimal level of protection that the equipment has to demonstrate under laboratory test conditions when tested in accordance with the European Norm.

Assigned Protection Factor: The level of respiratory protection that can be expected to be achieved in the workplace by 95% of adequately trained and supervised wearers using a properly functioning and correctly fitted respiratory device. (More information on Assigned Protection Factors is detailed in EN 529:2005 Respiratory Protective Devices – Recommendations for selection, use, care and maintenance – Guidance document).

Assessing the minimum required protection factor (MRPF) To determine your minimum required protection factor it is necessary to know the worst case concentration of airborne contamination in the work place.

NEVIS Mask Sizing Instructions

Use any convenient measuring tool to measure the distance from the bridge of your nose to the tip of your chin.

Do not follow the contour of the nose as this will give you incorrect measurements.

Plot your measurements on the graph below to find the best mask fit.

Product	Standard	Description	Classification	Nominal P.F	Assigned P.F (UK)	Filter Options	Additional Headpiece Certification

ICON KEY

As you may have noticed, we have created a dynamic new look for the Centurion brand. This goes far beyond “just a logo change”. Below, we have created a suite of icons to help simplify the navigation of our collection and enhance your experience.

ABS

Made with virgin ABS polymer, special grades of ABS that we have perfected over 15 years of ABS manufacturing experience.

Chinstrap - 2 Point Mounting Facility

2-point chinstrap mounting facility accessory to complement the Centurion range of helmets.

Chinstrap - 4 Point Mounting Facility

4-point chinstrap mounting facility providing additional wearer comfort and helmet stability.

Integrated Eyewear

Eye protection integrated to the helmet shell. Can provide increased impact protection, greater protection levels and a value proposition.

Reflective Stickers Available

High intensity reflective stickers available for increased visibility in poor lighting conditions.

Vented Helmet Available

Innovative ventilation system for increased airflow and a cooler helmet in warmer conditions.

Logo Service

Corporate badging available, pad printing service for helmets and embroidery or transfer print for caps.

Wheel Ratchet Headband

Premium Twist2Fit ratchet headband assembly for a secure fit.

Combi Accessory Slot

Patented Combi accessory slot for attachment of the full range of Euro and Connect accessories.

Euro Accessory Slot

Euro 30mm accessory slot for attachment of the full range of Centurion accessories.

Connect Accessory Slot

Connect accessory slot for attachment of the full range of Connect accessories.

Fire retardant

A substance that prevents or inhibits the outbreak of fire. Treated so as to be non-flammable.

High Temperature

Suitable for high temperature environments.

DryTech Sweatband

New premium DryTech sweatband provides up to 40% faster drying and absorbs 4x more moisture when compared to Centurion's previous Hydro-flock sweatband.

BSI Kitemark

BSI Kitemark approved. The Kitemark is an unrivalled stamp of quality.

Sustainable

A sustainable product made from materials traceable to their origin from select suppliers.

Made in UK

Made in the Centurion manufacturing facility in Thetford, Norfolk, UK.

Badge Holder Available

Fitted to accessory.

Anti Static

Approved to the Anti static / explosive atmosphere standard (IEC 60079-32).

Welding

Suitable for welding applications.

Working At Height

Suitable for working at height applications.

Forestry

Suitable for forestry applications.

First to Market

Centurion were first to bring the product/concept to market.

Our Commitment

Dedicated to continuous improvement, we are unwavering in our commitment to setting higher standards in safety, fairness, inclusivity. Safety remains our top priority, underpinned by a robust safety culture that ensures the well-being of our employees and partners. In our environmental journey, we proudly achieved ISO 14001 Accreditation in August 2021. This milestone not only reflects our commitment to environmental responsibility but also served as a catalyst for reviewing and enhancing our environmental credentials.

We are driven by a commitment to excellence, ensuring a safer, fairer, and environmentally conscious future.
